

Borambola Sport & Recreation Centre

UFD in conjunction with Wagga Catering and Ariismits Interior Design have recently redeveloped the Foodservice operations for Borambola Sport & Recreation Centre. The equipment package for the foodservice areas includes: Ecomanopy exhaust hoods, Desmon Refrigeration / Freezer systems, Goldstein Vision combi ovens, Goldstein cooking equipment as well as Eswood dishwashing equipment.

iL Pastaio @ Strathfield NSW

UFD has been involved in the enlargement of the existing iL Pastaio production facility in Strathfield.

The existing pasta line, pasta production line, packaging machine & meat mixer was cleaned, serviced & repositioned while the facility was fitted out with a new cool room, refrigeration plant & stainless steel all built to comply with WH&S requirements as well as Australian Standards.

Did You Know?

Did you know that Australia has a 87% recycling rate of paper & cardboard, one of the highest in the world.

Electrolux Efficient Dosing System

Electrolux have introduced an Efficient Dosing System (EDS). This system has been put in place to calculate the correct amount of detergent to use to eliminate damaged linen / skin irritations caused by detergent overdosing.

The system determines the linen weight at the beginning of each cycle and adds the correct amount of water, saving water as well as reducing ongoing costs for cleaning chemicals.

Ice-O-Matic Elevation Series

Ice-O-Matic has released a new range of ice makers, the Elevation series.

The current series is up to 20% more efficient with BPA-free plastic, recyclable parts and digital controls to monitor energy use.

The design allows hot air discharge from the side or the top of every unit, water distribution tube for ease of cleaning, as well as introducing a 545mm wide machine capable of producing 425kg of ice every 24 hours.

Did You Know?

Did you know that aluminium can be endlessly recycled without any loss of quality.
